Case Customization

Need a special case for your study species? Many studies can achieve their goal with one of our field-tested attachment styles, but we also work with many researchers who need custom solutions. Get in touch with us, and for a reasonable fee we can develop the custom solution you need.

GSM Data Plans

For over a decade, CTT has negotiated the best GSM rates for the data you need collected. Today, because of our extensive contracts with all cellular data providers, we can offer three plans to fit your study requirements. Billing can be done monthly, annually, or multi-year.

Plan	Description	Cost
Economy	<i>Includes GPS duty cycles up to 15-min frequency + ACC Activity Index</i>	\$60/year
Standard	<i>Includes GPS duty cycles up to 5-min frequency + ACC Activity Index</i>	\$120/year
Unlimited	<i>Includes GPS duty cycles < 5-min frequency + custom ACC data collection</i>	\$360/year

Optional Cellular Data Plan for CTT SensorStations

A network isn't a network unless it's connected, so from the ground up, we've included cellular connectivity in our Motus-compatible CTT SensorStations.

Option	Description	Price
SensorStation Data Plan	Includes remote system health reports such as battery voltage, solar panel voltage, and activity summaries. Full data is also automatically sent to the Motus servers and access to the CTT interface for viewing, downloading and analyzing.	\$5/month + Data (\$0.20/MB) up to 75 MB, then \$20/month, includes up to 500 MB. Any data over 500 MB is \$0.10/MB.

Note: There are many accessories for the Coded Digital Radio line which can all be found on our online store, store.celltracktech.com. Orders may be placed directly via the store, or to receive a quote you may use our inquiry form found here: <https://account.celltracktech.com/orders/inquiry/>
